STUDIO | WINDOWS+DOORS

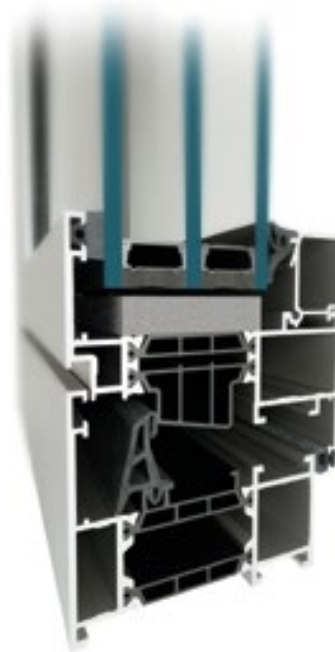

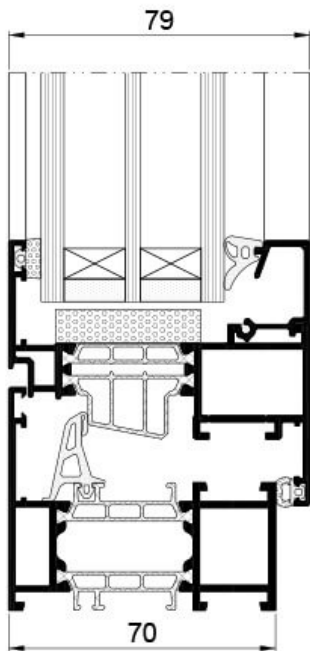

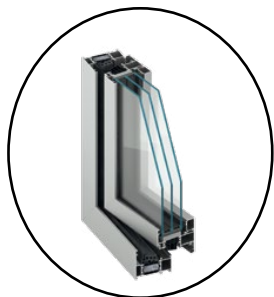

The Klar-79N is the most state-of-the-art and economical addition to the KLAR window systems. It has been designed to outperform typical thermal insulation requirements. The Klar-79N series can be used to fabricate fixed, side-hung, hopper, tilt-and-turn, and hopper-and-slide windows. In addition to the economical version Klar-79N E, featuring a one-component central seal, and the Klar-79N ST version with a two-component central seal, Klar also offers the Klar-79N SI variant with enhanced thermal insulation, and with profiles that come equipped with insulating inserts and a two-component central seal.
