

KLAR Pivot XL

Revolving doors

KLAR Pivot XL revolving door, landscape configuration

Even larger unique architectural solutions.

Revolving doors, the so-called KLAR Pivot XL door is a unique alternative to standard entrance doors or patio doors. The axis of rotation of the leaf is offset from the frame and therefore, even with very large dimensions and weight, the door is easy to open and close.

The KLAR Pivot XL door leaf can weight up 1120 LB (440.9 LB in the Residential variant). KLAR Pivot XL door guarantees very good tightness and thermal insulation.

KLAR Pivot XL doors allow for the construction of very high and wide entrance doors - the maximum dimensions in the XL variant are as much as 98" x 157" (over 8' x 13')

Landscape configuration is creating a spectacular construction by combining single sashes with each other.

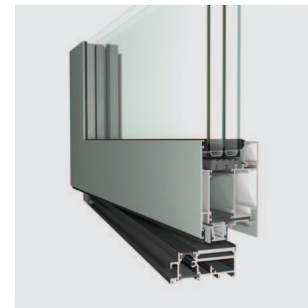

The door in size XL

Thanks to combination of advantages, KLAR Pivot XL doors provide possibilities, which no other product on the market gives.

They combine the following features:

- Very large dimensions, max. 98" x 157"
- Narrow profiles of 1.57"
- Thermal insulation
- Flat threshold
- Convenience of operation - automatic closing and in the open position 90°

KLAR Pivot XL door has been tested to European and US standard.

Revolving doors KLAR

- The possibility of creating structures with very large dimensions
- High thermal insulation: $U_f \geq 0.264 \text{ W/m}^2 \text{ K}$ for variant HI+
